

The Support System Behind the USA's Medical Technology Boom

Irwin & Associates Inc. has made itself one of the 'Best Medical Device Consultancy Services Company' by leaps and bounds in 2021 for the USA, working with clients across all manner of scales and operational goals. In essence, its support guarantees the betterment of a client's company across the board, from its regulatory compliance to its quality system or manufacturing processes, whether they are a start-up company or a well-established giant of enterprise.

Located in the San Francisco bay area, Irwin & Associates is the consulting firm supporting the medical device and biotechnology industries with exemplary advice and comprehensive support. Fundamentally, its top-of-the-range team is made up of subject matter experts in the areas of quality control, regulatory and legislative advice, manufacturing, engineering, technical writing, R&D, project management, design control, and software, making it a one-stop-shop for its medical device producing clients. It also brings itself significant notoriety and good repute with its work specifically focusing on small start-up company culture, particularly adapt at working with these clients in order to ensure they make quick and efficient progress on their flagship products, helping them reach their goals.

Additionally, Irwin & Associates is experienced in the support of mid-to-large sized companies, taking on key projects for such clients in order to allow them to launch new products or quickly acquire smaller companies. In essence, its work can be beneficial for all scales of company, no matter where a client

is in their business's lifespan. Above all else – and showing the value it puts on its relationships with its consultants and clients both – the firm is always looking towards working with synergy and effectiveness, championing working together in order to find greater levels of success. Irwin & Associates adeptly supports domestic and international clients at all stages of development, manufacture, and regulation, earning it a wide depth and breadth of experience and forming a truly outstanding portfolio of past successes throughout its 21 years of operation.

With excellent service, top notch engineers, and incredible scientific minds, its consultancy has made itself a support system like no other. Additionally, its office is staffed by anywhere between 8-20 consultants at any one time, ensuring that its close-knit team of experienced medical device professionals and experts work well together, something that has resulted in a team of people that are familiar with each other's work from previous jobs. It is this that makes for the outstanding and friendly environment that Irwin & Associates has become known for alongside the excellence of its work. When a new client begins a project with Irwin & Associates,

they can immediately benefit from an expert Consultant ready to make quick progress which ensures their medical device company is well prepared for a bright future.

Although Covid-19 posed some challenges to Irwin & Associates and companies like it as it was harder than ever to meet up face to face with clients, it worked hard to make the pivot happen, implementing technological platforms in order to ensure it could keep in contact with its team and its clients. In essence, as a group, it made itself more flexible than ever in order to take the pandemic in its stride.

This was what has allowed Irwin & Associates to keep working throughout the outbreak and to continually support its clients, something that has resulted in taking on more start-up companies and see an increase in the growth of new technologies and projects. It does not forecast this development slowing down anytime soon, excited to see what projects it will be taking on next, and promising to take both its staff and its clients forward into the future of medical technology.
